Using a Credit or Debit Card To Purchase Fuel?

£1m Fraud - Sparks Fuel Card Debate

“A £1 Million fraud has proved that chip and PIN (Credit and Bank Debit) cards are not fraud proof and according to a leading security expert, a fuel card is still the most secure way for most fleets to pay for fuel”.

Fleet News, May 11, 2006.

Abbey fuelcards do not contain our customer's personal details, such as bank account numbers etc and therefore are far more secure than bank credit and debit cards.

Plus these additional SECURITY benefits:

- exclusive security features - zero liability, actionline*
- no cash transactions and card purchases controlled
- detailed invoicing showing individual cards and transactions
- on-line account administration to stop cards
- dedicated account manager
- transactions can be restricted to fuel only

For more information on how abbey can increase your SECURITY, reduce the cost and increase the convenience of fuel purchases contact Rich, Nick or Steve on 01235 775 200, alternatively visit our website at www.abbey-fuelcards.co.uk.
